Community of Practice (CoP) for MND Care

Helping improve the care of those living with Motor Neurone Disease

Please join us if you are a health professional or service provider who is involved in, or has an interest in, improving care for people living with Motor Neurone Disease (MND).

Our upcoming CoP meeting

Topic: Caring for the carer

Carers play a vital role throughout the illness journey, yet their needs can change significantly over time. In this session, we will explore how we can best support carers across the different phases of the illness trajectory.
We will hear from our lived experience representatives, CoP participants, and an expert panel with extensive knowledge of the current carer support landscape. Together, we will discuss the challenges carers face, share practical experiences, and identify opportunities to strengthen support.

This session aims to:

- Understand the lived experience of carers.
- Share approaches and experiences in supporting carers.
- Explore existing supports, services, and resources.
- Learn where and how additional support can be accessed.

Join us for a thoughtful discussion on how we can better recognise, support, and empower carers throughout their journey.

Please register for the COP for MND Care meeting via QR code or link below.
