MAERSK TRAINING

Training portfolio

Learning today, leading tomorrow.

Global experience, operational excellence and training built around the real challenges of your operation.

TRAINING LOCATIONS

Rio de Janeiro · Rio das Ostras · Natal · Fortaleza · In company · Offshore

CERTIFICATIONS AND APPROVALS

OPITO · DNV · IADC · IWCF · The Nautical Institute · ISO · IMO · Brazilian Navy · Marshall Islands Registry · GWO

WHO WE ARE

Over 40 years of training for the maritime, offshore and energy sectors.

With a global presence and training centres on every continent, we offer a wide range of training solutions focused on practical development and operational excellence. In Brazil, we run four training centres and we also bring our expertise to you — on board or online — always with nationally and internationally recognised certification.

TRAINING AREAS

Maritime

Navigation, dynamic positioning, ship handling, anchor handling operations, safety and compliance with Brazilian maritime legislation.

Oil and Gas

Well control, drilling, MODU stability, emergency response, cranes and cargo handling.

Renewables

BST, BTT, advanced rescue, service lifts and instructor qualification.

Aviation

Civil aviation security and dangerous goods by air.

SPECIALISED SOLUTIONS

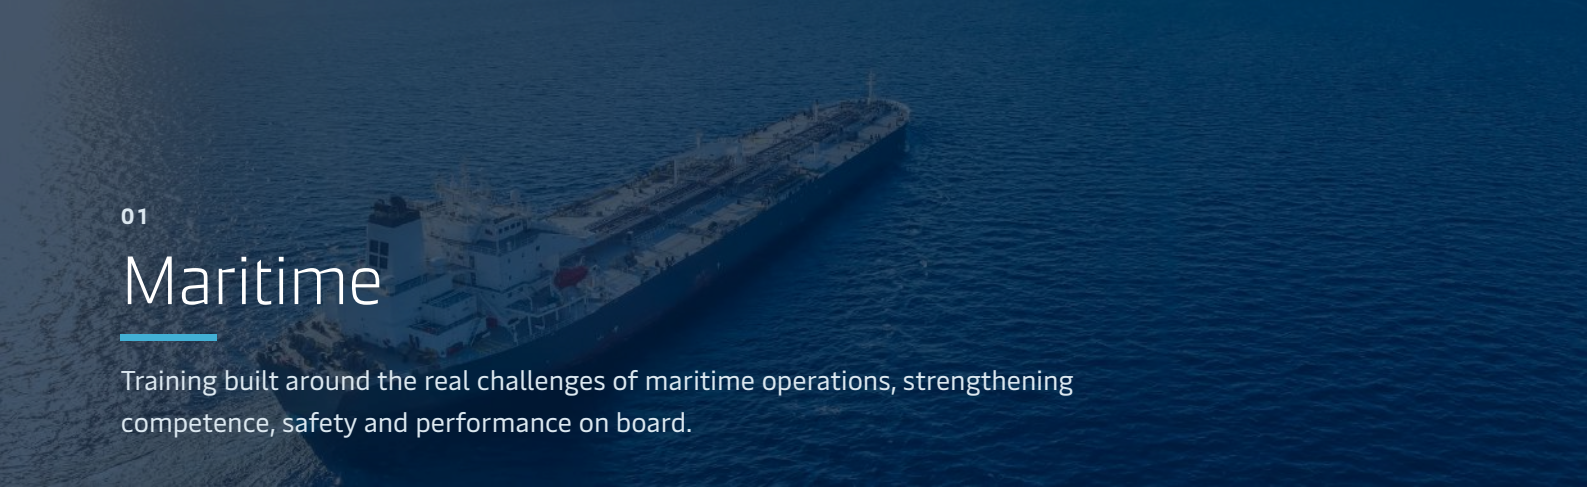

Onboard Training

An instructor on board, delivering tailored training to your offshore team.

TMS — Training Management Services

End-to-end management of your training, with more control, efficiency and visibility for the operation.

DELIVERY FORMATS In person · Virtual (live) · E-learning

01

Maritime

Training built around the real challenges of maritime operations, strengthening competence, safety and performance on board.

Navigation and bridge operations

- Anchor Handling Courses
- NI Dynamic Positioning (DP) Courses
- Winch Operator
- Offshore Vessel Basic Knowledge
- Ship Handling for Offshore Vessels
- Azimuthal Ship Handling Offshore Vessels
- Ship to Ship Operation
- Bridge Resource Management (Brazilian flag approved)
- NI DP Vessel Maintainer Course (DPVM)

Safety and emergency response

- Bridge — Major Emergency Management Training (offshore vessels)
- OPITO Major Emergency Management Initial Response Training (MEMIR)
- ESCM — Medic First Aid Special Course (Brazilian flag approved)
- First Aid — CPSO (Brazilian flag approved)
- Safety Delegate
- Ship Security Familiarization Course — STCW 1978 A-VI/6 (CPFN)
- Ship Security Awareness — STCW 1978 Tables A-VI/6-1 and A-VI/6-2 (EBCP)
- Vessel Personnel Designated Security Duties (VPDSD) — STCW A-VI/6 (Marshall Islands approved)
- Ship Security Officer — STCW 1978 Rule VI/5 (EOPN)
- Advanced Coxswain Training (ACT) with Desktop Freefall Lifeboat Simulator

Cargo handling and stowage

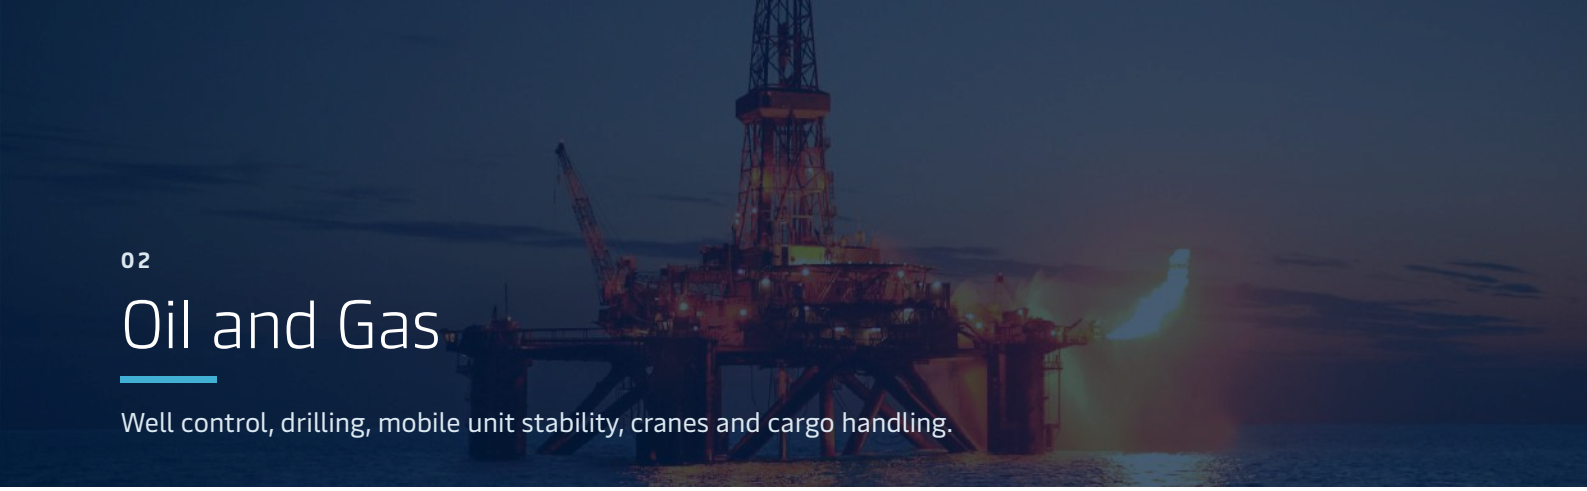

- Operation with Dangerous Goods in Waterways Work — EOCA (Brazilian flag approved)
- Stability for Offshore Vessels

Environmental compliance and management

- Marpol 73/78 Appendix I Course (Brazilian flag approved)
- ISM / ISPS Code
- IGF Code — basic and advanced
- Methanol as Marine Fuel — basic and advanced

People and leadership

- Human Element Leadership and Management (HELM), Management Level — STCW 1978
- Crew Resource Management (CRM)
- Leadership Training

02

Oil and Gas

Well control, drilling, mobile unit stability, cranes and cargo handling.

Safety and emergency response

- OPITO Major Emergency Management Initial Response (MEMIR) Training
- Offshore Installation Manager — Controlling Emergencies — OIM CE (Assessment)
- Ship Security Familiarization Course — STCW-1978 code section A-VI/6 — Brazilian Flag Approved (CPFN)
- Ship Security Awareness — STCW 1978 Tables A-VI/6-1 and A-VI/6-2 — Brazilian Flag Approved (EBCP)
- Vessel Personnel Designated Security Duties — VPDSD — STCW Section A-VI/6 — Marshall Islands Approved
- Ship Security Officer — STCW 1978 code Rule VI/5 — Brazilian Flag Approved (EOPN)
- Advanced Coxswain Training (ACT) with Desktop Freefall Lifeboat Simulator
- OIM Licensing

Well control and managed pressure operations

- IADC WellSharp Courses
- IWCF Courses
- Basic Drilling Practices
- Advanced Drilling Practices (with CRM)
- Managed Pressure Drilling Fundamentals
- Managed Pressure Drilling Intermediary
- Managed Pressure Drilling Supervisor (CRM optional) with Simulator

Stability and rig move

- Stability 1 for MODU — Ballast Control Operator (BCO)
- Offshore Stability & Ballast Control For Semi-submersibles (Stability 2) — BCO
- Comprehensive Stability for MOU (BCO)

People and leadership

- Driller Competency Assessment
- Crew Resource Management
- PEAT — Environmental Education Program

Cranes, cargo handling and safety

Crane operator

- Crane Operator Competency Assessment
- Crane Operator / Banksman Best Practices
- Offshore Crane Operator Stage 1 - (DNV GL)
- Offshore Crane Operator Stage 2 - (DNV GL)
- Offshore Crane Operator Stage 2 — Reassessment (DNV GL)
- Offshore Crane Operator Stage 3 — Assessment (DNV GL)
- Offshore Crane Operator Stage 3 — Reassessment (DNV GL)
- Enhanced Crane Operator Program

Lifting and cargo handling

- NR-11 Overhead crane — 16 h
- NR-34 Safety in cargo handling operations, basic — 20 h
- NR-34 Complementary course for lifting equipment operators — 20 h
- NR-37 Safety in cargo handling and personnel transfer, basic — 20 h
- NR-37 Complementary course for crane operators — 20 h
- Wire rope inspection and socketing — 16 h
- Safe operation of mobile elevating work platforms — 16 h
- Safe forklift operation — 16 h

Electrical, machinery and boilers

- NR-10 Safety in electrical installations and services — 40 h
- NR-10 Refresher — 16 h
- NR-10 Electrical power systems (SEP) — 40 h
- NR-10 SEP refresher — 16 h
- Classified areas and explosive atmospheres — 16 h
- NR-12 Machinery and equipment safety — 8 h and 16 h
- NR-13 Boiler operation safety — 40 h
- NR-13 Process unit operation safety — 40 h

Flammables and fuels — NR-20

- Initial course
- Basic course
- Intermediate course
- Advanced course I
- Advanced course II
- Specific course

Confined spaces, work at height and general standards

Confined spaces and work at height

- NR-33 Confined space entry supervisor — 40 h
- NR-33 Attendants and authorised workers — 16 h
- NR-33 Refresher — 8 h
- Authorised gas testing person — 8 h
- NR-35 Work at height — 8 h
- NR-35 Interpretation of the standard
- NBR 16710 Rescue at height and/or confined space — industrial level
- NBR 16710 Rescue at height and/or confined space — operational level

Shipbuilding and ship repair — NR-34

- Induction training — 6 h
- Induction refresher — 4 h
- Scaffolding supervisor — 40 h
- Scaffolding erection and dismantling — 16 h
- Hot work — general module — 4 h
- Hot work — portable rotary tools — 4 h
- Hot work — cutting torch — 4 h
- Hot work — welding — 4 h
- Hot work — other activities — 4 h
- Hot work fire watch — 8 h
- Tightness testing, basic — 8 h
- Tightness testing, refresher — 8 h
- Safety in painting activities — 8 h
- Interpretation of the standard — 4 h

Oil platforms — NR-37

- Basic training — 6 h
- Advanced training — 8 h
- CIPLAT — 20 h
- Complementary course for work on high-voltage electrical installations — 16 h

HSE management and general standards

- NR-05 CIPA — 20 h
- NR-06 Personal protective equipment — 8 h
- NR-17 Ergonomic conditions — 8 h
- NR-30 Waterway workers' health and safety — 8 h
- Risk assessment — 8 h
- Permit to work — 4 h
- Management of change — 8 h
- Hand safety — 4 h
- PEAT — Environmental education — 2 h
- Fast-track English course — health and safety — 40 h

03

Renewables

Training for wind industry professionals, covering onshore and offshore activities — from basic safety through to technical training, rescue and work at height.

GWO · GLOBAL WIND ORGANISATION

BST · Basic Safety Training

GWO APPROVED · BST · BST-R

WAH Working at Heights	**FA** First Aid	**FAW** Fire Awareness	**MH** Manual Handling

04

Aviation

Initial and refresher training for professionals working in aviation security and in the transport of dangerous goods, in line with the applicable ANAC requirements.

CIVIL AVIATION SECURITY

AVSEC

For professionals working to prevent acts of unlawful interference, in line with RBAC 110 requirements.

- AVSEC Basic — **Initial**
- AVSEC Basic — **Refresher**
- Civil Aviation Security Screening — **Initial**

DANGEROUS GOODS

DGR

For professionals involved in the preparation, acceptance, handling and transport of dangerous goods, in line with RBAC 175 requirements.

- Dangerous Goods by Air — CAT 06 (RBAC 175), **Initial**
- Dangerous Goods by Air — CAT 06 (RBAC 175), **Refresher**

COMPLIANCE Training delivered in line with the applicable ANAC requirements and current regulations.

NEXT STEP

Request the calendar and plan your team's next training.

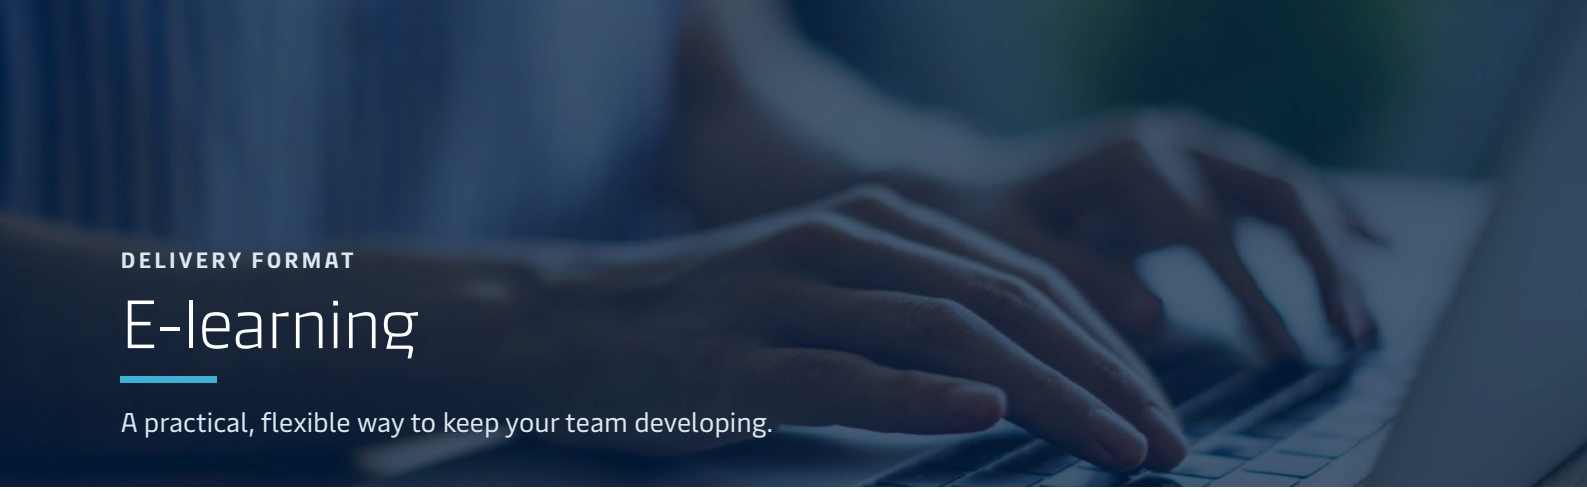

Tell us how many participants you have and which courses you need, and we'll put together the best training solution for your operation.

MAERSK TRAINING

DELIVERY FORMAT

E-learning

A practical, flexible way to keep your team developing.

Online access, at each participant's own pace — no travel and no time away from the operation.

NATIONAL CATALOGUE

E-learning in Portuguese

Brazilian Regulatory Standards (NRs), classified areas and interpretation of standards, with national certification.

View the Portuguese courses →

GLOBAL CATALOGUE

Global e-learning

Maersk Training's international catalogue, available in several languages, for multinational crews and operations.

View the global catalogue →

How it works

01 **Choose the courses** — tell us which courses and how many participants.

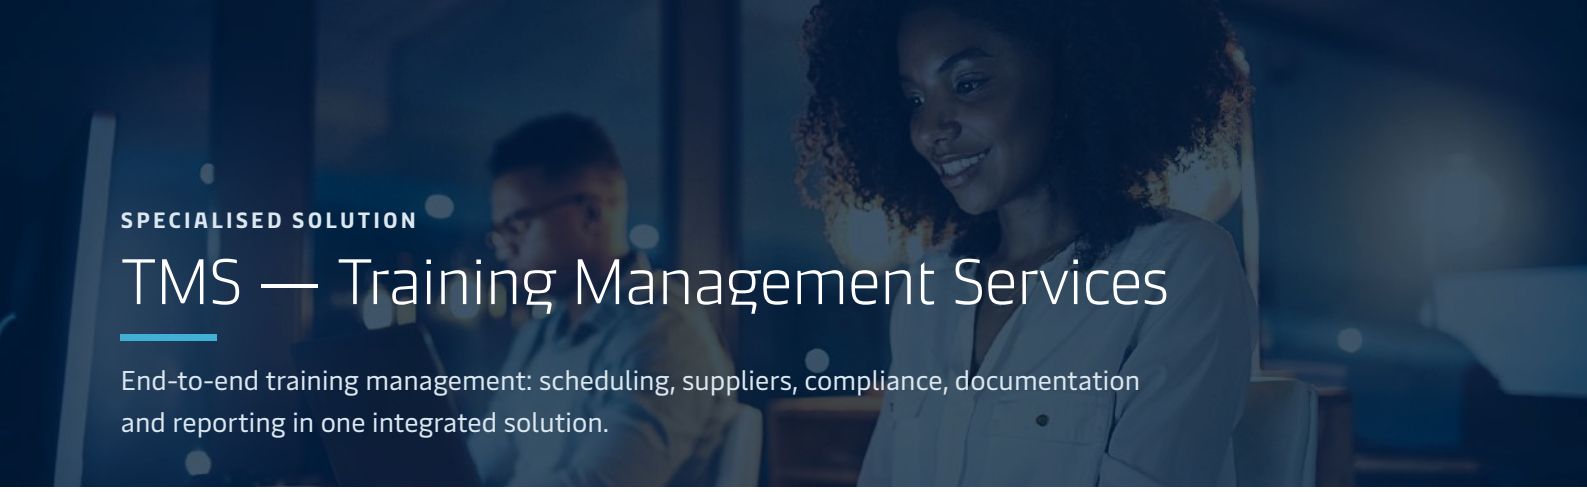

02 **Access granted** — each participant gets a login and starts whenever they like.

03 **Certificate issued** — a record ready for your training matrix.

REQUEST ACCESS

Tell us the courses and the number of participants.

SPECIALISED SOLUTION

TMS — Training Management Services

End-to-end training management: scheduling, suppliers, compliance, documentation and reporting in one integrated solution.

We centralise the management of your training — from supplier coordination and scheduling through to certificate control, compliance and reporting — bringing more structure, visibility and efficiency to the whole operation.

More efficiency. More focus on the operation.

Compliance

Track requirements, certificates and expiry dates with more control, and keep the information you need always to hand.

Competence

Track and evidence your team's competence with clear, up-to-date data on how each person is developing.

Scheduling

We centralise supplier coordination, scheduling and invoicing, with simpler processes and a single consolidated invoice.

Start with your cost

Quick audit

Five questions, two minutes, and an approximate figure for the hidden costs to take to your next leadership meeting.

Run the audit →

The full calculator

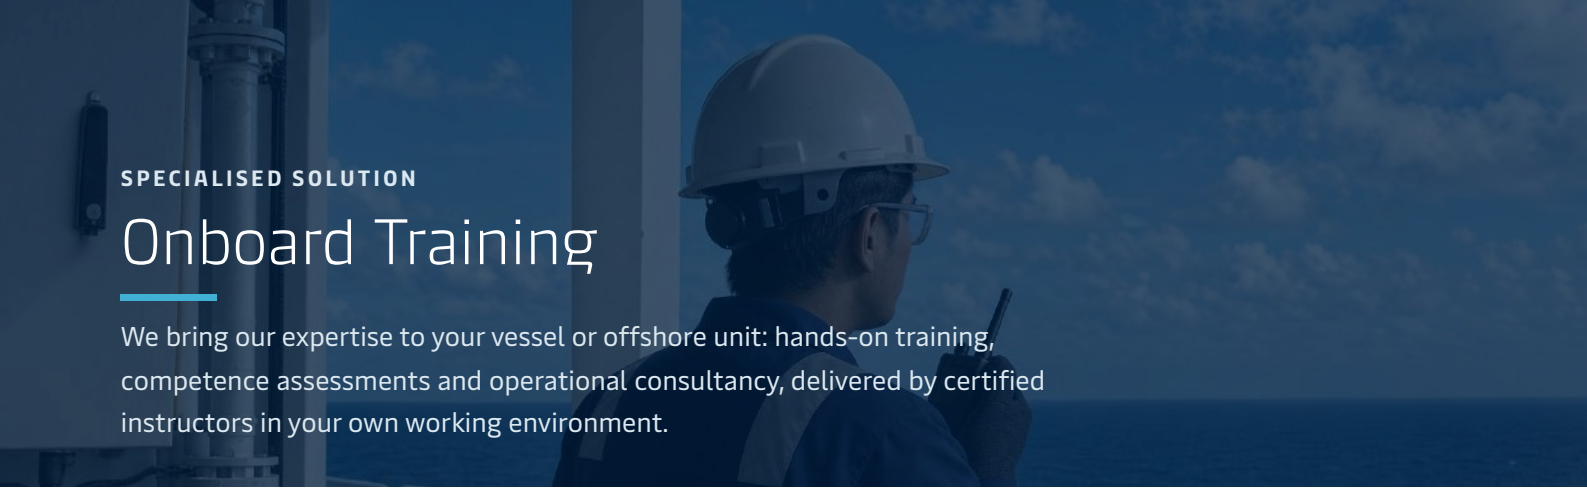

Go deeper with 11 cost components, benchmarks for your sector and a PDF report to support decision-making.

Calculate the total cost →

NEXT STEP

Want to see how this works in your operation?

Share your current training matrix — or just the list of roles — and we'll show you how TMS can simplify management and bring more efficiency and visibility to your operation.

SPECIALISED SOLUTION

Onboard Training

We bring our expertise to your vessel or offshore unit: hands-on training, competence assessments and operational consultancy, delivered by certified instructors in your own working environment.

Benefits

Real application

Training in the working environment itself, with good practice applied straight away.

Lower cost

The team stays in the operation, cutting travel and accommodation costs.

Tailored content

Training adapted to the specific needs and challenges of your operation.

Safety culture

Our instructors help strengthen a solid culture of safety and compliance.

Matrix in order

More than 35 courses available on board, covering the requirements in your matrix.

Flexible scheduling

Sessions arranged around the team's rota, without interrupting the operation.

How it works

01 **Initial assessment** — we map the training needs, the expected duration and the instructor best suited to the operation.

02 **Instructor mobilisation** — the instructor travels to the vessel or unit, for a duration that suits the operation.

03 **Coordination and briefing** — activities are aligned with the OIM or the master, including the applicable safety briefings.

04 **Training delivery** — sessions run on board, with a constant focus on safety and compliance.

05 **Close-out and report** — a report with observations and recommendations, and certificates for participants who pass.

06 **Final evaluation** — the unit management reviews the training and the instructor, feeding continuous improvement.

THE EXPERIENCE OF OUR INSTRUCTORS

Technical specialists with extensive industry experience, from basic safety training through to competence assessments.
