BOSSARD SMARTLOCKER

Automated – intelligent – controlled

SmartLocker is a secure, RFID access-controlled inventory system with a fully automated order process, ideal for storing your consumables and high value items. The stored items can only be accessed by RFID recognition securing full access and usage control. Moreover, SmartLocker automatically places replenishment orders ensuring you never run out of parts. All relevant inventory data is transmitted to the operation dashboard of our supply chain platform ARIMS.

FEATURES

ACCESS CONTROL – via identity card (RFID card)

USAGE CONTROL – via Web API

FULLY AUTOMATED order process

WEIGHT SENSORS – Physical stock information

ERROR PROOF – Automated error recognition

FULL CYCLE CONTROL
