BOSSARD SMARTBIN CLOUD

Real-time stock control made simple

Lets takes your inventory management to the next level. Motion-activated sensors update stock data in real-time with every pick or refill. When levels run low, reorders are triggered automatically.

Order status and product info are visible on each bin. The system integrates with your infrastructure and gives you secure, reliable access to real-time data anywhere on the shop floor.

BOSSARD SMARTBIN CLOUD

ORDER PROCESS WITH BOSSARD SMARTBIN CLOUD

1. **Automatic demand recognition**
   Replenishment orders are automatically triggered when reorder points are reached, with order status and delivery date displayed instantly.

2. **Seamless order management**
   Data is transmitted online to Bossard and processed efficiently. The order status and delivery date on the label are updated automatically.

3. **Consolidated shipment**
   Ordered items are consolidated and shipped to your factory.

4. **Delivery and replenishment**
   Depending on the service level, ordered items are delivered either to your dock, supermarket or directly to the point of use. The replenishment of the correct bin is recognized automatically.
