COOKIES AND TRACKING TECHNOLOGIES

Cookies and Pixels

Cookies are small text files which are placed on your browser when you visit a website. Cookies are widely used to make websites work and for other purposes. Pixels (also known as web beacons) are code embedded in a service that sends information about a browser or device to a server. Pixels provide similar functionality to cookies, but are not always browser-based. When you access a service that contains a pixel, the pixel may

permit us or a third party to drop or read cookies on your browser, or collect other information about your browser or device.

We use cookies and pixels for the following purposes:

- **Strictly necessary.** These cookies and pixels are necessary for the website to function and cannot be switched off in our systems. They are usually only set in response to actions made by you which amount to a request for services, such as setting your privacy preferences, logging in or filling in forms. You can set your browser to block or alert you about these cookies and related pixels, but some parts of the site will not then work.
- **Performance.** These cookies and pixels allow us to count visits and traffic sources so we can measure and improve the performance of our site and understand analytics. They help us to know which pages are the most and least popular and see how visitors move around the site.
- **Functional.** These cookies and pixels enable the website to provide enhanced functionality and personalisation. They may be set by us or by third party providers whose services we have added to our pages. If you do not allow these cookies then some or all of these services may not function properly.
- **Advertising.** These cookies and pixels may be set through our site by our advertising partners. They may be used by those third parties to build a profile of your interests and show you relevant adverts on other sites. If you do not allow these cookies and pixels, you will experience less targeted advertising.
- **Social media.** These cookies and pixels are set by a range of social media services that we have added to the site. They are capable of tracking your browser across other sites and building up a profile of your interests. This may impact the content and messages you see on other websites you visit. If you do not allow these cookies you may not be able to use or see these services.

The **cookies management module** available on our website allows you to control the use that we and our partners make of the cookies present on the website. You can choose at any time to accept, refuse, or set them all according to our choices by clicking on the appropriate button in the cookies management module, except for cookies strictly necessary for the use of the website that you cannot deactivate.

In addition, most browsers allow you to manage your cookies preferences by changing your browser settings. You may set your browser to:

- Automatically reject or accept all cookies
- Refuse or accept first party cookies and/ or third parties cookies

- Receive a notification before any cookies are saved, giving you the chance to decide whether to accept it.

Your browser's "Help" function should tell you how to do this. Your ability to limit cookies is subject to your browser settings and limitations.

Certain third parties offer opt-out tools relating to cookies and pixels:

- To opt-out of Google Analytics, visit <https://tools.google.com/dlpage/gaoptout>.
- The companies we work with to provide you with Interest-based Advertising may be participants of the Digital Advertising Alliance ("**DAA**"). To opt out of receiving Interest-based Advertising from the participating companies, please visit <https://www.aboutads.info/choices> for website opt outs. Note that opting out through these links only means that you should no longer see interest-based ads from the selected participants on the browser or device from which you opted out, but does not mean that the participants will not process your information for Interest-based Advertising purposes.

Please note that cookie management only applies to our website and not our apps or other parts of the Services. If you use multiple browsers, you will need to instruct each browser separately. If you delete or reset your cookies, you will need to reconfigure your settings.

For app-specific pixels, you can stop all collection of information via an app by uninstalling the app. For Apple iOS, we will only receive access to your device's Ad ID (known as an IDFA) if you provide consent. You can reset your device's Ad Id at any time through your device settings, which is designed to allow you to limit the use of information collected about your device. To opt out of receiving Interest-based Advertising from participating companies with the DAA, please visit <https://www.aboutads.info/appchoices>.

We are not responsible for the effectiveness of any third party opt outs.

Precise-Location Technologies

With your consent when you launch our app, we may get access to the precise location technologies on your device (such as GPS or Bluetooth) and collect precise-location data from your browser or device. You can stop all collection of precise-location data through an app by uninstalling the app or withdrawing your consent through your device settings.
