

# Teamwork can take on challenges.

When dog, owner and vet work together, Cushing's is on the losing side.

**VETORYL**<sup>®</sup>  
Life restored on every level

# Cushing's Clinical Score

Is the dog showing signs of being unwell? Is the dog showing signs of Cushing's?

Drinking/urination

Appetite

Appearance

Attitude/activity

# Quality-of-life

Consider the specific treatment needs of individual patients as well as their owners.

Use the scientifically validated tool, CushQoL-pet, to help you communicate these discussions.

# Physical examination

This provides an opportunity to look for signs that the dog is unwell and/or has concurrent disease.

You are also able to check that your physical findings support the clinical history provided by the owner.

# Cortisol assessment

My patient is unwell (vomiting, diarrhoea, off food)

**Undertake an ACTH stimulation test**

My patient is showing signs of Cushing's

**Undertake a Pre-Vetoryl Cortisol**

My patient is showing no signs of Cushing's

**Undertake a Pre-Vetoryl Cortisol**

Since the Pre-Vetoryl Cortisol test does not feature on the Vetoryl Summary of Product Characteristics, informed owner consent for 'off-label' monitoring should be obtained.
