

Element dosage rates for various chlorinators

The charts below outline maintenance dosing of **Elements** required to raise salinity to the correct level based on chlorinator requirements. ie if your chlorinator is a 4000ppm salt chlorinator use the appropriate chart. The cells in the calculation are the quantities of bags needed

Pool Size		10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000	100,000
