WHY CHOOSE EXCEPTIONAL AGILITY?

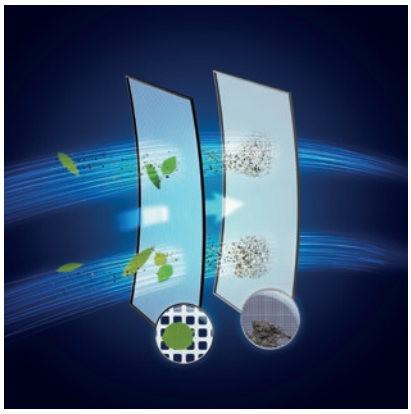

CYCLONIC PERFORMANCE

Its patented cyclonic suction is powerful and long-lasting. Debris is kept in suspension to avoid filter clogging and to maintain the same level of cleaning performance throughout the cycle.

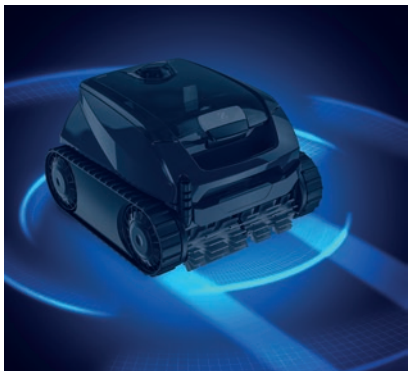

With its new Helix propeller brushes, Duo-X™ sucks up even the smallest debris more effectively, without pushing it out. The DX4550 iQ and DX4000 feature front and rear brushes, while the DX3000 features front brush only.

Its two-layer dual-stage filtration system (150µ/60µ) collects both large and small debris. With Duo-X™, your pool will be perfectly clean all year round. The filter canisters are easy to remove and debris can be cleaned easily without touching.

INTEGRATED AGILITY

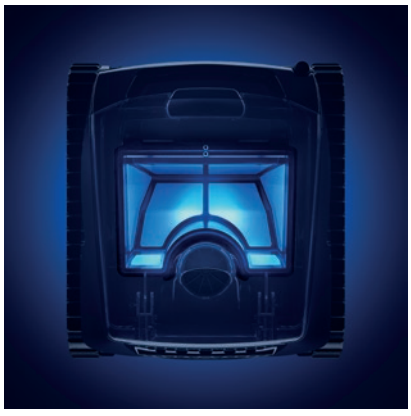

With its embedded smart sensors and its unique design, Duo-X™ offers excellent coverage of the pool and limitless agility. It is, therefore, ideal for all pool shapes and linings.

FLUIDRA POOL

With the Fluidra Pool Application, check on cleaning progression at any time. The device is also upgradeable thanks to the automatic updating of its functionalities. Some models offer an adjustable cycle time and a remote control feature. Available only on DX4550 iQ model.

EASE OF USE

Its transparent window and backlit filter, which can be accessed from above*, offer a real ease of use on a daily basis. The filter canisters are easy to remove and debris can be cleaned easily without touching.

Automatic swivel system prevents cable tangling during cleaner operation in the pool. The cleaner efficiency is optimized and the cable storage is easier. Enjoy hassle free storage with the included convenient caddy (for DX4000 and DX4550 iQ).

With its patented Lift System technology, Duo-X™ positions itself at the water line of the selected wall and expels water to make the device lighter for removing it from the water.
