Durable Construction

The Titan Series fibreglass sand filters are constructed to ensure you receive years of service with minimum maintenance. Built with 2 layers to the body of the unit, the inner tank is made from food-grade polyethylene while the external tank is constructed from strong woven fibreglass to extend the life of the filter. The filters are also equipped with a robust base to ensure extra stability

User Friendly

The ergonomic design is a pleasure to use. Equipped with an ergonomic palm-shaped multi-port handle, a large sight indicator glass for clear backwash inspection, oil filled pressure gauge for easy inspection of operating pressure, clamp lock design head with 360° rotation (ZT500- ZT650 models) for easy installation and a drain plug to make maintenance a breeze.

Quality Assurance

All Zodiac Titan Series fibreglass sand filters are quality inspected and factory pressure tested at 400kpa (max working pressure 250kpa).
