EvoluX iQ™

With its Sensor Nav System™, the EVOLUX iQ™ robotic pool cleaner identifies the configuration of your pool to optimise the cleaning path and cleaning time. The patented cyclone suction guarantees extremely powerful and long-lasting suction. Thanks to the patented Lift System™, EVOLUX iQ™ is lighter when removing it from the water. Control your cleaner anywhere, anytime through the intuitive interface of the Fluidra Pool App. EVOLUX iQ™ is upgradable thanks to possible optimisations and automatic remote updates over the air.

Easy to Use

The patented Lift System™ allows the cleaner to be lighter and completely effortless when it is removed from the water. With easy access to the filter and the visibility of a transparent window, the EvoluX iQ™ makes for the ultimate pool cleaning experience.

Suction Efficiency

Combining the constant power of its patented Cyclonic Suction with an impressive filtration system, the EvoluX iQ™ sets the benchmark in debris collection.

Customised Cleaning

Equipped with a Sensor Nav System™, the EvoluX iQ™ robotic pool cleaner learns your pool's configuration to fully optimise the cleaning path and cleaning time. The pressure sensor also delivers efficient wall climbing and waterline cleaning by measuring the depth of the pool.

Intuitive App Navigation

Control and monitor the progress of the cleaning cycle anytime, anywhere, using the intuitive interface of the Fluidra Pool application. To stay up to date, the EvoluX iQ™ constantly evolves thanks to constant automatic remote feature updates.

Dual Stage Filtration 150µ/60µ filter canister

With easy access and smart canister design, cleaning and removing debris has never been more easier with dual filters to capture both small and large debris.

Transparent canister window with LED illumination

The LED light and transparent window make it easy to see inside, even while submerged.

Swivel Cable

The swivel mechanism helps prevent the cable from tangling while submerged.
