

Product Discontinuation of the current transformer terminal strip for UMG

Dear Sir or Madam,

We would like to inform you about an upcoming change in our product portfolio that affects the current transformer terminal strips for UMG.

As part of our continuous portfolio optimization and to ensure long-term product availability, reliability, and technological relevance, the current transformer terminal strip will be discontinued. This decision is based on ongoing technical development.

Product Discontinuation Timeline

Please note the following key dates:

Last order: 30 September 2026

Last delivery: 19 December 2026

End of standard support: 19 December 2026

After the end of the standard support, Janitza will no longer provide regular technical support, firmware updates and repairs for the current transformer terminal strip. Warranty obligations for devices delivered prior to this date will, of course, be fulfilled in accordance with contractual terms. However, no new software features or non-critical bug fixes will be released.

Migration Recommendation

To ensure continuity and future-proof system planning, we recommend the **current transformer terminal strip 1/5A CT** as the successor to the Current transformer terminal strip for UMG.

Your benefits with the current transformer terminal strip 1/5A CT

- Push-X-technology
- Conductor connection without ferrules
- Tool-free conductor connection

Our sales staff and Solution Partners are available to answer technical questions or advise you on alternative devices.

Kind regards,

Michael Kadziela
Managing Director
