

# KS4 Statutory and Recommended First Aid Pathway

The Department for Education recommends that pupils at KS4 should know:

- How and when to deliver CPR and understand the concept and use of Automated External Defibrillation (AED)
- In addition we suggest you also understand the concepts of common first aid emergencies and consider a recap of first aid skills gained at KS2 and KS3.

Follow the map of recommendations to provide your pupils with a sound knowledge of first aid.

**Well done...**  
if you have completed  
all modules you are a  
KS4 first aider
