

## **Gard Insights on NavStation: Delivering safety where it matters most**

For those at sea, every decision counts, and in the dynamic world of shipping, timely access to the right information can make all the difference. That's why Gard and Navtor have partnered to launch Gard Insights on NavStation. This is a major step toward making loss prevention knowledge accessible and easy to use for crews and operators worldwide.

The content in this article does not constitute professional advice, and any reliance on such information is strictly at your own risk. Gard AS, including its affiliated companies, agents and employees, shall not be held liable for any loss, expense, or damage of any kind whatsoever arising from reliance on the information provided, irrespective of whether it is sourced from Gard AS, its shareholders, correspondents, or other contributors.

NavStation provides an ideal channel for Gard's extensive loss prevention insights and awareness material. By embedding this content directly into tools used for voyage planning and operational decisions, navigators and operators will receive timely and relevant safety advice.

*"This collaboration reflects our shared commitment to making safety knowledge accessible where it matters most. By integrating Gard's expertise into Navtor's trusted platforms, we help empower crews and decision-makers with insights that support safer operations", says Line Dahle, EVP Industry Impact at Gard.*

## **Empowering safer voyages**

The partnership between Gard and Navtor is rooted in a shared vision: to empower maritime professionals with knowledge that supports safer operations. Navtor's digital platforms are trusted by thousands of vessels for route planning and ship-shore connectivity. With Gard's expertise available on these platforms, guidance on risk management and safety culture is always within reach.

*“Making Gard’s insights timely and relevant within Navtor’s workflow empowers crews and managers to act proactively. By embedding loss prevention strategies - covering navigation, cargo, and compliance - into tools used for route planning and operational decisions, navigators gain immediate access to guidance that reduces risks and prevents incidents”, says Marius Schønberg, Vice President, Head of Loss Prevention at Gard.*

## **Knowledge at your fingertips**

NAVTOR users can get access to Gard insight articles through the e-Publication Reader module in NavStation, updated weekly and compiled annually for easy reference.

*NAVTOR’s COO, Børge Hetland, says of the integration: “Our mission has always been to make life easier for shipping companies. Simplifying the distribution of relevant information is a key part of that and we see that when information is easily accessible, it is utilised more frequently. This partnership aligns with our strategy to reduce the number of applications and software onboard, giving crews fewer, more streamlined digital platforms. In addition, by providing mariners with decision-support tools for planning safe and efficient routes, such as Gard’s trusted insight articles, we deliver added value to our customers and strengthen the very mission our company is built upon.”*

Serving more than 18,000 vessels worldwide, NavStation provides a trusted platform for delivering knowledge. Gard and Navtor view this as the start of a growing collaboration - one that strengthens safety culture across the maritime industry.

### *About Gard*

*Gard is a shipowner controlled, world leading provider of P&I, marine and energy insurance. The company has a gross written premium of USD 1.2 billion (2024) and insures 18,000 oceangoing vessels. Gard has 784 employees across 15 offices worldwide. Founded in 1907 in Arendal, Norway, the company holds an A+ rating with a stable outlook from Standard & Poor's.*

### *About Navtor*

*NAVTOR has established itself as a world leader in e-Navigation since launching in 2011, providing e-Navigation, digital logbooks and performance solutions for the maritime sector. NAVTOR is headquartered in Norway and operates a global network of 13 offices, serving customers in more than 90 countries. The company employs over 400 specialists worldwide.*
