4. Medical spa

The Medi-Spa offers a unique escape where scientific precision meets wellbeing. Our technologies target circulation, stubborn fat, tone, and firmness to deliver optimized results. All treatments are non-invasive and supervised by Dr Pierre-Michel Havet, ensuring a personalized and effective experience.

EM Sculpt Neo - A Muscular Body Without Effort

EMSculpt® Neo is the only treatment in the world that effectively builds muscle in the abdomen, love handles, thighs, or buttocks while reducing localized and visceral fat. Relax during the session and achieve results comparable to an intense workout.

Coolsculpting
Cryolipolysis & body contouring

A non-invasive cryolipolysis technology that uses controlled cooling to target localized fat cells and encourage their natural elimination over time. Ideal for areas resistant to diet and exercise, this treatment gradually reshapes the silhouette and refines body contours.
A personalized consultation is recommended before each treatment to assess the areas to be treated and determine the most suitable protocol.
