## WHAT IS TBC E-COMMERCE API?

TBC E-commerce API is an opportunity to accept online payments from your customers in a simple and comfortable way.

## TBC E-COMMERCE API INTEGRATION

### Steps to follow for TBC E-commerce integration:

- 1. Merchant Registration** – create your merchant account in TBC E-commerce API
- 2. Merchant Dashboard** – obtain merchant credentials – follow the link <http://ecom.tbcpayments.ge> and sign in with Company Director's internet banking individual user ID and password. Navigate to Website Management from the Merchant Dashboard and after you click on 'Details' in Website Management, you will see your 'Client ID' and 'Client Secret';
- 3. WordPress – Woocommerce plugin installation**- set up your online store with WordPress, install TBC E-commerce and enter your 'Client ID' and 'Client Secret';
- 4. Testing** – once you obtain the necessary credentials, you can test the services via Postman. After you enter the credentials on your side, you can start test transactions. Testing is done in a real environment, with a real payment card. You can cancel test transactions by clicking on 'Cancel' in Transaction Details in the Merchant Dashboard. A 50 GEL limit will be activated during testing. Please carry out small amount test transactions not to exceed the limit.
- 5. Going Live** – After testing has been completed successfully, go to the merchant's dashboard <https://ecom.tbcpayments.ge/> , navigate to **\*\*Website Management\*\*** and click on „რეალური გარემოს გააქტიურება“.

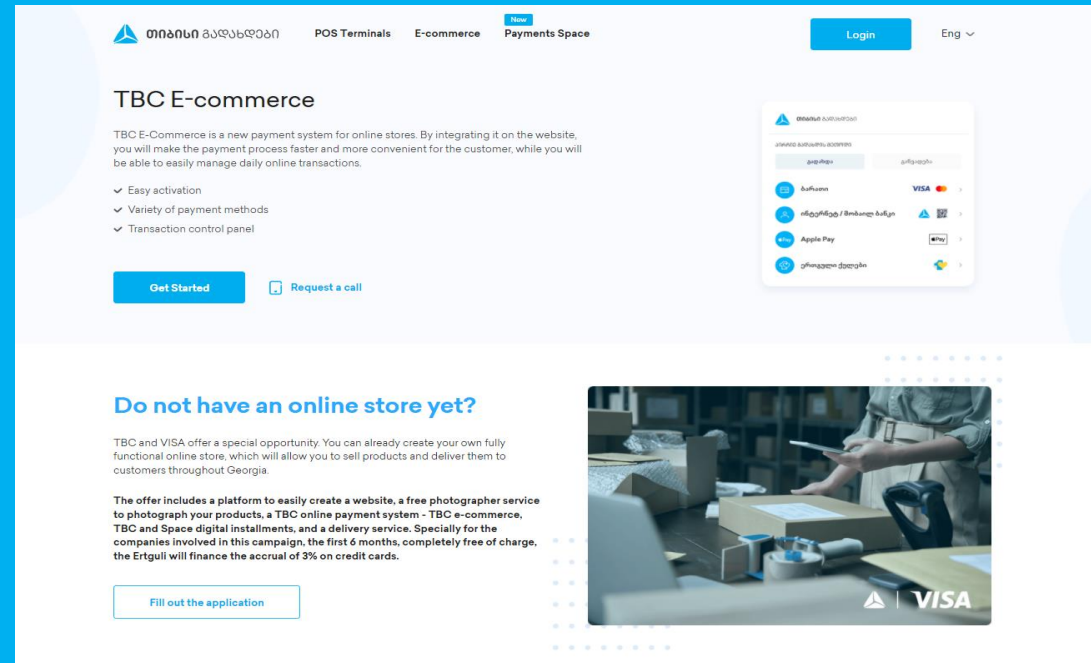

## MERCHANT REGISTRATION

If you are not registered as a merchant on TBC E-commerce,\* click on **'Request a Call'** on <https://tbcpayments.ge/details/ecom/tbc> or fill out an application form by clicking on **'Join Now'**.

Our representative will contact you and help you through the merchant registration process.

Your company's account will be set up during the registration. Once you sign the agreement, you will be able to access the online merchant admin panel with your TBC internet banking user credentials.

A test transaction limit will be activated in your merchant account and you will be able to start technical integration and testing.

The screenshot displays the TBC E-commerce website interface. At the top, there is a navigation bar with the TBC logo and the text 'თიბისი პაიკსები', along with menu items for 'POS Terminals', 'E-commerce', and 'Payments Space'. A 'Login' button and 'Eng' language selector are also present. The main content area is titled 'TBC E-commerce' and includes a brief description of the service, a list of benefits (Easy activation, Variety of payment methods, Transaction control panel), and two call-to-action buttons: 'Get Started' and 'Request a call'. To the right, there is a visual representation of the payment interface showing various payment methods like 'ბანკის ბიზნეს აკაუნტი', 'VISA', 'Apple Pay', and 'კრედიტული ბარათები'. Below this, a section titled 'Do not have an online store yet?' offers a special opportunity, listing benefits such as a free website platform, a free photographer service, and a delivery service. A 'Fill out the application' button is located at the bottom of this section. On the right side of the page, there is an image of a person working at a desk with a computer and a VISA logo.

- Skip this step if you are already registered on TBC

# MERCHANT DASHBOARD

To obtain merchant credentials for TBC E-commerce integration:

1. Follow <https://ecom.tbcpayments.ge/> and sign in with Company Director's internet banking **individual** user credentials;
2. Select your company;
3. Click on 'Website Management' in the sidebar menu;
4. Click on 'Details';
5. After your website details appear, click on the 'Eye' button in the 'Technical Details' section. An SMS with a one time password (OTP) will be sent to your mobile number registered with the Bank. Enter OTP into the password field. If OTP is entered correctly, the program will display your Client Secret.

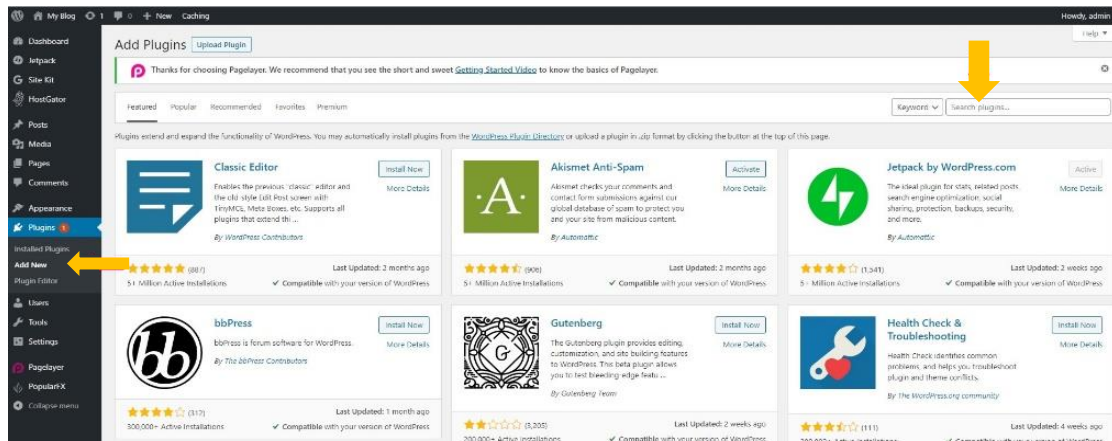

**Attention:**

**Client ID and Client Secret are your TBC E-commerce credentials and must not be disclosed to unauthorized third parties.**

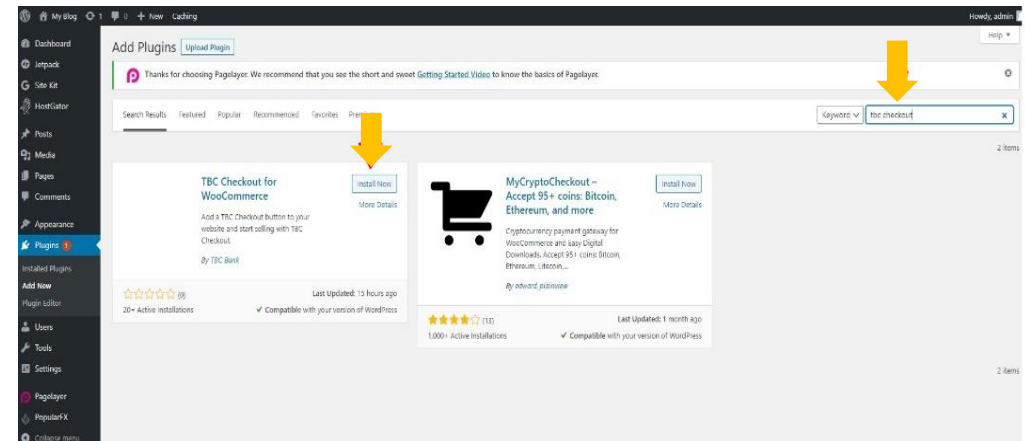

# Installing a WordPress plugin

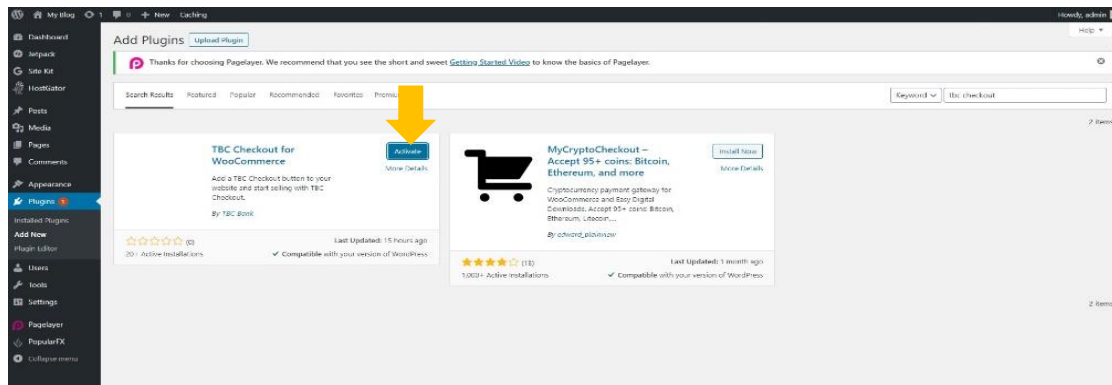

1 Click on 'Plugins' in the sidebar menu, then click on 'Add New' under 'Plugins' and enter 'TBC Chekout' into the search box.

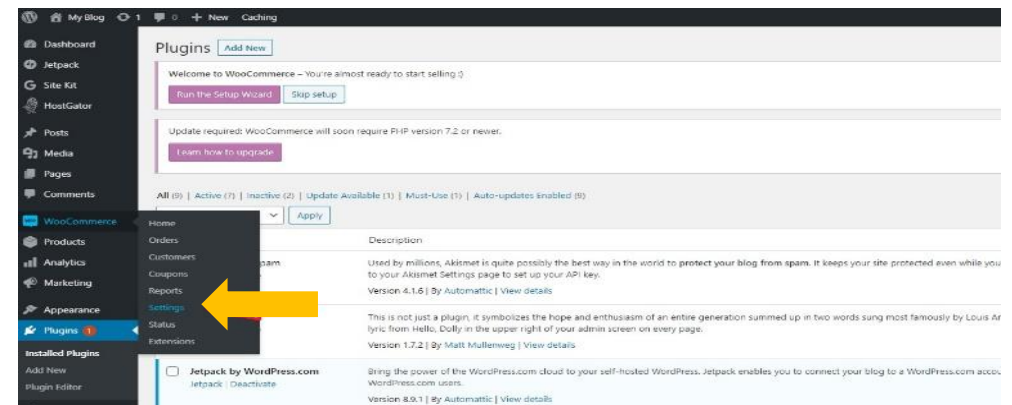

2 Find 'TBC Chekout for WooCommerce' in search results and click on 'Install Now'.

3 When the installation is complete, click on 'Activate'.

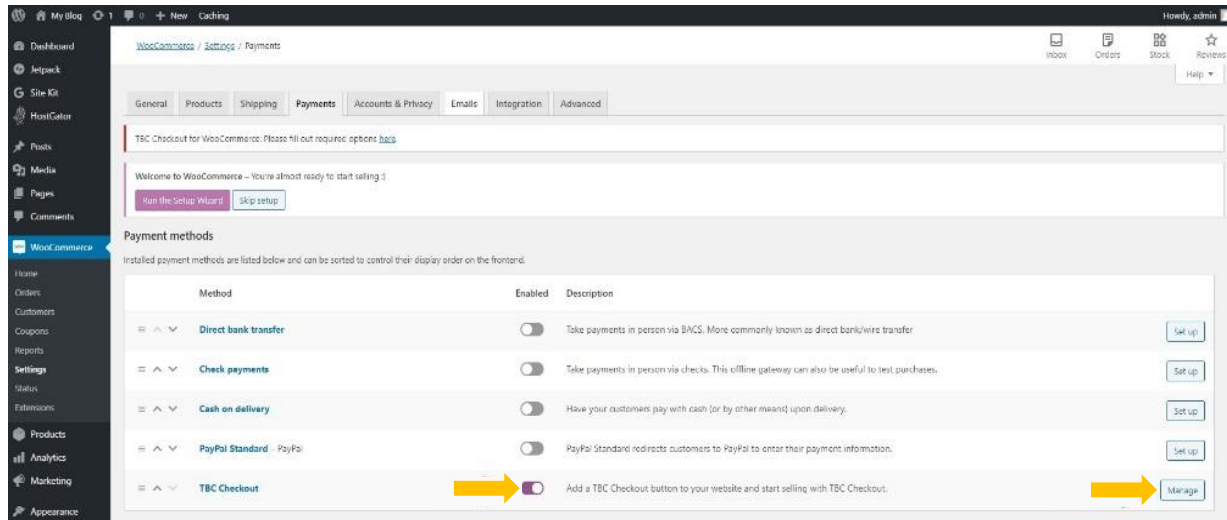

4 Go to WooCommer>Settings.

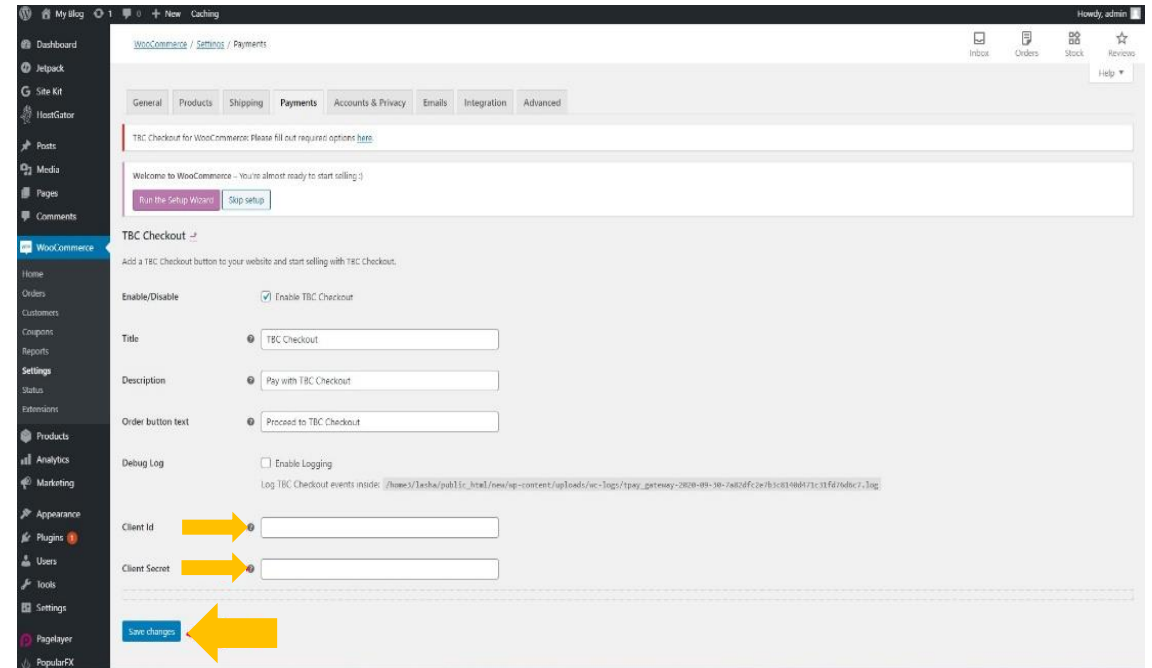

# Installing a WordPress plugin

5 Enable **TBC Chekout** under Payment Methods in the Payments tab.

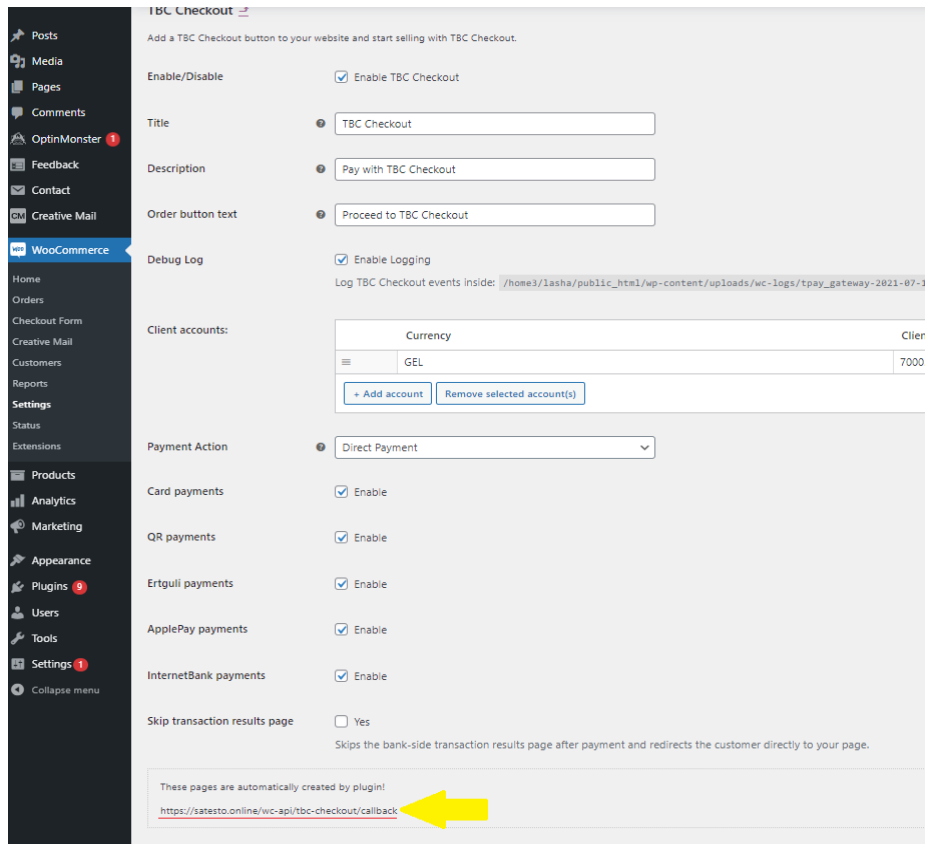

6 Enter into TBC Chekout authentication fields your **Client ID** and **Client Secret**, which you obtained from the Merchant Dashboard

# WORDPRESS – Callback URL

**7** A Callback URL is a URL where the Bank submits a transaction status report, which means that the transaction status will be displayed instantly.

Copy the Callback URL from your WooCommerce TBC Chekout plugin and paste it into the Callback field in Site Management Settings, <https://ecom.tbcpayments.ge>

TBC Checkout

Add a TBC Checkout button to your website and start selling with TBC Checkout.
