**Recall: component no. G0010024416/MEYLE no. 514 752 0011 suitable for the Ford Focus III and Volvo V40 II**

MEYLE stands for the manufacture and sale of high-quality and quality-tested spare parts in the independent aftermarket.

Unfortunately, the MEYLE wheel hub specified above does not meet the customary high MEYLE standards. As we are unable to rule out a material defect on the wheel hub, its removal is urgently required.

The component number with which the part can be identified is G0010024416 – this can be found directly on the wheel hub.

Please see to it that your vehicle is taken directly to a workshop without delay. **As a precautionary measure, we explicitly recommend that the vehicle be towed to the nearest workshop.** MEYLE will assume the costs incurred for this.

Naturally, all the standard costs associated with the replacement will likewise be covered. **The returning of the wheel hub will usually be arranged by your workshop. If this is not possible, please send it and the warranty claim directly to MEYLE:**

MEYLE AG  
f.a.o. Complaints department  
Merkurring 111
